RKL eSolutions Acquires Bay Area Sage Partner Accuvar

Acquisition continues expansion of RKL's presence on West Coast, with more on-site services and expert resources available to combined client base.

LANCASTER, PA – MARCH 02, 2015 – [RKL eSolutions](#), an ERP software provider headquartered in Pennsylvania, announced the acquisition of Northern California-based Sage Partner, Accuvar, Inc. The acquisition includes Accuvar's two offices (San Francisco Bay Area and Sacramento), 12 employees, and more than 170 current customers using solutions that [span the Sage portfolio](#). This represents the latest in a series of company and customer growth initiatives that places RKL eSolutions among top-tier Sage software providers.

RKL president Joe Noll says the Accuvar acquisition fits nicely with his company's strategic growth model which is based on adding a balanced combination of product, consulting, and support at a measured pace. "Accuvar's sales, service and support experience across the Sage product portfolio will have a strong and positive impact on our ability to serve both new and existing customers."

Accuvar president Joanne Wasak adds, "This acquisition makes two great firms even better as one. Our respective areas of focus and consulting specialties complement each other really well and it's going to bring a fresh perspective to our entire customer base. It's an exciting time for us and our clients."

Accuvar vice president Tim Palin is equally excited about the synergy of combined staff and ownership. "We are excited to be joining the RKL family and look forward to a long and productive relationship. We have known and worked with many of the team members for years as a result of our Sage practice and believe this will allow us to deliver an even higher level of service and support to our clients."

The RKL eSolutions customer base in the West has been growing for the last few years and the new regional offices in California will benefit customers there and in Arizona. But Noll insists that RKL's expansion brings operational efficiency and advantages that aren't strictly territorial. "While it's fair to say we're officially coast-to-coast now, our objective isn't just expansion for expansion's sake. With Accuvar staff added to our roster, we now have top-notch expertise that's physically close to our clients. With less traveling across time zones, we can provide faster, more cost-effective, and highly personalized service and support on-site."
