RKL eSolutions Adds Sage ERP X3 to Its Product Portfolio

Sage reseller now offering web-based ERP software for mid-sized distributors and manufacturers conducting business in the international marketplace.

Lancaster, PA – March 31, 2011 – RKL eSolutions (www.rklesolutions.com), a Sage ERP reseller and technology provider headquartered in Pennsylvania, has announced the addition of Sage ERP X3 to its product portfolio which also includes Sage ERP MAS 90 and MAS 200, Sage ERP MAS 500, Sage ERP Accpac, Sage SalesLogix CRM, and Sage FAS Asset Accounting Software.

Developed for mid-sized distributors and manufacturers, Sage ERP X3 is a web-based business management platform with a broad range of capabilities found in larger systems but without the complexity or expense typically associated with an enterprise software implementation.

Joe Noll, President at RKL eSolutions, expressed excitement about the new addition. "Sage ERP X3 is in our market sweet spot – medium-sized businesses that need a system that's easy to implement, built for the international marketplace, and at a price that fits their budgets. Its inclusion in our product portfolio gives us unique market presence and strength. Small, medium, or large, we can align our customers with an accounting or ERP system that matches their needs."

Noll adds that Sage ERP X3 puts an end to the search for a cost-effective system designed for global business. "No other ERP – for large or small business – provides the unique combination of features and built-in localization found in Sage ERP X3. That makes it ideal for companies with customers or operations in multiple countries, currencies, and languages."

In addition to the typical functionality required of a true ERP system – integrated accounting and financial management, sales, purchasing, inventory management, and manufacturing – Sage ERP X3 features native web architecture, simplifying deployment and access across multiple companies and locations. With built-in multilingual capabilities, Sage ERP X3 automatically conforms to national workflow preferences, regulations, and currencies without the cost and complexity of customization.

Anne Brennan, VP of Business Development, states "Now as a Sage ERP X3 partner, we are able to provide an additional option for our current customers who may be looking to move up from their existing Sage platform and stay within the Sage family of products. For prospective new customers, the

addition of Sage ERP X3 means we have a broader range of business software options to more closely align with their operational needs, budget, and growth potential."

RKL is based out of Pennsylvania, Massachusetts and Virginia. Visit www.rklesolutions.com to learn more about Sage ERP X3 or the [accounting software](http://www.rklesolutions.com) solutions that RKL implements for customers.
